ultramicroscopy

Subject index to volumes 31–40

Analytical microscopy

The experimental requirements for quantitative measurement of carrier recombination at defects in semiconductors using the EBIC technique, *Wilshaw* 31 (1989) 177

AEM characterization of sintered silicon nitride with yttria and alumina additions, *Chadwick and Malis* 31 (1989) 205

Dependence of X-ray detector orientation on Cliff–Lorimer factor for quantitative microanalysis in an electron microscope, *Hashimoto, Wakai and Yamaguchi* 32 (1990) 121

Image processing of partially periodic lattice images of polymers: the study of crystal defects, *Pradère and Thomas* 32 (1990) 149

On the interpretation of high resolution electron microscopy images of premartensitic microstructures in the Ni–Al β_2 phase, *Schryvers and Tanner* 32 (1990) 241

Iron $L_{2,3}$ near-edge fine structure studies, *Krishnan* 32 (1990) 309

ELNES of 3d transition-metal oxides. I. Variations across the periodic table, *Krivanek and Paterson* 32 (1990) 313

ELNES of 3d transition-metal oxides. II. Variations with oxidation state and crystal structure, *Paterson and Krivanek* 32 (1990) 319

Absorption and fluorescence corrections for X-ray analysis with large-solid-angle detectors: thin films and spheres, *Zreiba and Kelly* 33 (1990) 187

Experimental determination of the efficiency function of an X-ray detector using submicron spheres, *Zreiba and Kelly* 33 (1990) 199

Dynamic electron microscopy of copper–palladium intermetallic compound catalysts, *Gai and Smith* 34 (1990) 17

The structure of ruthenium supported on titania: a catalyst for low-temperature methanation of carbon dioxide, *Ruterana, Buffat, Thampi and Graetzel* 34 (1990) 66

Quantitative Pt and Rh distributions in pollution-control catalysts, *Lyman, Hepburn and Stenger* 34 (1990) 73

Digital X-ray mapping on an HB501 STEM; a new approach for the analysis of interfaces, *Long* 34 (1990) 81

Characterisation of zeolite catalysts using electron energy loss spectroscopy, *McComb and Howie* 34 (1990) 84

On the imaging of Pt atoms in zeolite frameworks, *Rice, Koo, Disko and Treacy* 34 (1990) 108

Quantitative chemical lattice imaging: theory and practice, *Ourmazd, Baumann, Bode and Kim* 34 (1990) 237

A new form of the extrapolation method for absorption correction in quantitative X-ray microanalysis with the analytical electron microscope, *Horita, Sano and Nemoto* 35 (1991) 27

The use of the Fresnel Method for the characterisation of a short-period strained Ge/Si multilayer. I. Measurement of the average Ge/Si volume ratio, *Shih and Stobbs* 35 (1991) 197

The use of the Fresnel Method for the characterisation of a short-period strained Ge/Si multilayer. II. Measurement of a layer-thickness irregularity, *Shih and Stobbs* 35 (1991) 217

Electron spectroscopic imaging of dopant precipitation and segregation in silicon, *Frabboni, Lulli, Merli, Migliori and Bauer* 35 (1991) 265

Composite thin-film characterization by atom probe field ion microscopy, *Melmed and Camus* 35 (1991) 277

Artifacts of specimen charging in X-ray microanalysis in the scanning electron microscope, *Miller* 35 (1991) 357

The possibilities for analytical methods in photoemission and low-energy microscopy, *Bauer* 36 (1991) 52

Compositional variations in apatites with respect to preferential ionic extraction, *Cuisinier, Glaisher, Voegel, Hutchison, Brès and Frank* 36 (1991) 297

Multiple scattering correction by a direct convolution method, *Su and Schattschneider* 36 (1991) 385

Analytical electron microscopy of catalytic materials, *Bradley and Targos* 37 (1991) 210

Observations of wet cement using electron microscopy, *Lange, Sujata and Jennings* 37 (1991) 234

Quantification in high-resolution electron microscopy with the imaging plate, *Shindo, Hiraga, Oku and Oikawa* 39 (1991) 50

Evaluation of accuracy in the ALCHEMI method, *Nakata, Tadaki and Shimizu* 39 (1991) 72

Cross-sectional observations of gold–silicon reaction on silicon substrate in situ in the

Elsevier Science Publishers B.V.

high-voltage electron microscope, *Sumida and Ikeda* 39 (1991) 313
Structural and valence electronic analysis of electron-irradiation-induced foreign-atom implantation by a combination of UHVEM and AES, *Yasuda, Sakata and Mori* 39 (1991) 321
Surface wave excitation Auger electron spectroscopy of Si(001) reconstructed surfaces, *Nakayama, Nishino, Ueda, Takeno and Fujita* 39 (1991) 329

Conventional electron microscopy
A transmission electron microscopy study of grain boundaries in zeolite L, *De Gruyter, Verduijn, Koo, Rice and Treacy* 34 (1990) 102
A comparative study of microstructure (in ITO films) and techniques (CTEM and STM), *Rauf and Walls* 35 (1991) 19

Cross sections
Calculation of the angular and energy distribution of multiple scattered electrons using Fourier transforms, *Reimer* 31 (1989) 169
Inelastic scattering of high-energy electrons in real space, *Coene and Van Dyck* 33 (1990) 261

Cryomicroscopy
A side-entry cold holder for cryo-electron microscopy, *Henderson, Raeburn and Vigers* 35 (1991) 45
Temperature directly affects the rate of irradiation-induced mass loss from phosphatidylcholine multilayers, *Lamvik, Magid, Davilla and Córdova* 35 (1991) 351
Three-dimensional reconstruction of single particles embedded in ice, *Penczek, Radermacher and Frank* 40 (1992) 33
Effect of temperature on radiation damage to aromatic organic molecules, *Fryer, McConnell, Zemlin and Dorset* 40 (1992) 163

Detectors, photographic and other
Investigation of system-induced background radiation using a 0–160 keV high-purity germanium detector, *Schmidt and Feller-Kniepmeier* 34 (1990) 229
TEM evaluation of absorption parameters using a particularly suitable Faraday cage: comparison with previous methods, *Martinelli and Sacerdoti* 34 (1990) 289
Utility test of imaging plate as a high-resolution image-recording material for radiation-sensitive specimens, *Isoda, Saitoh, Moriguchi and Kobayashi* 35 (1991) 329
Performance of electron image converters with YAG single-crystal screen and CCD sensor, *Daberkow, Herrmann, Liu and Rau* 38 (1991) 215
Grooved fluorescent plate for parallel-detection electron energy loss spectroscopy in ultra-high-voltage electron microscopy, *Yoshida, Takaoka, Ura, Katsuta and Matsui* 39 (1991) 45
Quantification in high-resolution electron microscopy with the imaging plate, *Shindo, Hiraga, Oku and Oikawa* 39 (1991) 50

Diffraction and optical diffraction
On the HOLZ contribution to STEM lattice images formed using high-angle dark-field detectors, *Spence, Zuo and Lynch* 31 (1989) 233
Self-consistent solution of the reflection diffraction problem, *Marks and Ma* 31 (1989) 241
Dynamical diffraction effects on higher-order Laue zone lines in CBED patterns of semiconductors, *Okuyama, Matsumura, Kuwano, Oki and Tomokiyo* 31 (1989) 309
High-energy electron diffraction from transverse stacking faults in the projection approximation, *Jesson and Steeds* 31 (1989) 399
Simulating high-angle annular dark-field STEM images including inelastic thermal diffuse scattering, *Wang and Cowley* 31 (1989) 437
Electron spectroscopic diffraction, *Reimer, Fromm and Naundorf* 32 (1990) 80
Identification of the Laue zone number in hcp systems in convergent beam electron diffraction, *Jackson* 32 (1990) 181
Laue zones: a clarification of nomenclature, *Eades* 32 (1990) 183
Tuned voltage in zone-axis diffraction, *Glaisher, Spargo and Self* 32 (1990) 299
Convergent-beam electron diffraction characterization of dislocations in GaS single crystals, *De Blasi, Manno and Rizzo* 33 (1990) 143
Electron diffraction and lattice image simulations with the inclusion of HOLZ reflections, *Qin and Urban* 33 (1990) 159
Direct phase determination in electron crystallography: the crystal structure of an *n*-paraffin, *Dorset and Zemlin* 33 (1990) 227
Electron diffraction conditions and surface imaging in reflection electron microscopy, *Yao and Cowley* 33 (1990) 237
X-ray diffraction studies of catalysts, *Cohen* 34 (1990) 41
Study of highly dispersed Pt in Y-zeolites by STEM and electron microdiffraction, *Pan, Cowley and Chan* 34 (1990) 93
High-angle ADF and high-resolution SE imaging of supported catalyst clusters, *Liu and Cowley* 34 (1990) 119
Quantitative absorption corrections for electron diffraction: correlation between the-

ory and experiment, *Rossouw, Miller, Drennan and Allen* 34 (1990) 149
A study of directly recorded RHEED and BKD patterns in the SEM, *Baba-Kishi* 34 (1990) 205
Electron beam deflection by a dielectric wedge, *Martínez-Torregrosa, Garcia-Molina and Gras-Martí* 34 (1990) 283
Analysis of extended defects in melt-grown GaSe single crystals by convergent beam electron diffraction techniques, *De Blasi and Manno* 35 (1991) 71
Fine details in satellite HOLZ reflection discs of CBED from a GaAs/AlAs multilayer, *Gong and Schapink* 35 (1991) 171
Automated structure factor refinement from convergent beam patterns, *Zuo and Spence* 35 (1991) 185
A treatment of dynamical diffraction for multiply layered stuctures, *Rossouw, Al-Khafaji, Cherns, Steeds and Touaitia* 35 (1991) 229
Effects of energy filtering in LACBED patterns, *Jordan, Rossouw and Vincent* 35 (1991) 237
Plan-view diffraction contrast imaging of surface-relaxation effects from strained-layer superlattices, *Perovic and Weatherly* 35 (1991) 271
Effect of surface roughness of carbon support films on high-resolution electron diffraction of two-dimensional protein crystals, *Butt, Wang, Hansma and Kühlbrandt* 36 (1991) 307
Image resolution enhancement by combining information from electron diffraction pattern and micrograph, *Fan, Xiang, Li, Pan, Uyeda and Fujiyoshi* 36 (1991) 361
Convergent beam electron diffraction and X-ray diffraction characterization of strained-layer superlattices, *Duan and Fung* 36 (1991) 375
On the symmetry characteristics of diffraction contrast images of microtwins, *Sheinin and Kim* 37 (1991) 116
Is electron crystallography possible? The direct determination of organic crystal structures, *Dorset* 38 (1991) 23
Electron crystallography at atomic resolution: ab initio structure analysis of copper perchlorophthalocyanine, *Dorset, Tivol and Turner* 38 (1991) 41
Energy-filtered convergent-beam electron diffraction in STEM, *Xu, Loane and Silcox* 38 (1991) 127
Convergent-beam electron diffraction study of modulations in semiconductor superlattices, *Fung, Xie and Duan* 38 (1991) 143
Utilization of STEM nanodiffraction data, *Konnert and D'Antonio* 38 (1991) 169
Theory of phase correlations in localized inelastic electron diffraction and imaging, *Wang and Bentley* 38 (1991) 181
Validity of the kinematical approximation in transmission electron diffraction for surfaces, revisited, *Marks, Savage, Zhang and Ai* 38 (1991) 343
Convergent beam electron diffraction in the high-voltage electron microscope with continuously variable reference voltage for lenses and alignments, *Kuroda, Morita, Arai, Yokoi and Saka* 39 (1991) 58
High-voltage electron diffraction study of structure factors of Pd and Pt, *Matsumura, Ohboshi, Oki and Tomokiyo* 39 (1991) 65
Quantitative TDS absorption corrections for LACBED patterns from GaP and InAs, *Allen, Rossouw and Wright* 40 (1992) 109

Electron energy loss spectroscopy

Electron microscopic channelling imaging of thick specimens with medium-energy electrons in an energy-filter microscope, *Lehmpfuhl, Krahl and Swoboda* 31 (1989) 161
Using ELNES with parallel EELS for differentiating between a-Si:X thin films, *Auchterlonie, McKenzie and Cockayne* 31 (1989) 217
Accurate modeling of particle–substrate coupling of surface plasmon excitation in EELS, *Ouyang and Isaacson* 31 (1989) 345
Identification of precipitable Ca^{2+} by electron spectroscopic imaging and electron energy loss spectroscopy in the organ of Corti of the guinea pig, *Heinrich, Drechsler, Kreutz and Mann* 32 (1990) 1
Calcium compartmentation in Antarctic brown algae, *Döpfner, Wiencke and Kirst* 32 (1990) 7
Cytochemical localization of calcium in the central nervous system of vertebrates, *Körtje, Freihöfer and Rahmann* 32 (1990) 12
Ultrastructural localization of aluminium in amphibian larvae, *Böhmer and Rahmann* 32 (1990) 18
Preparation of plant material for elemental analysis using ESI and EELS techniques, *Lehmann, Kramer, Schulz and Probst* 32 (1990) 26
Electron spectroscopic imaging (ESI) of viruses using thin-section and immunolabelling preparations, *Özel, Pauli and Gelderblom* 32 (1990) 35
Contrast tuning by electron spectroscopic imaging of half-micrometer-thick sections of nervous tissue, *Wagner* 32 (1990) 42
Quantitative energy-filtered image analysis in cytochemistry. I. Morphometric analysis of contrast-related images, *Sorber, De Jong, Den Breejen and De Bruijn* 32 (1990) 55
Quantitative energy-filtered image analysis

in cytochemistry. II. Morphometric analysis of element-distribution images, *Sorber, Van Dort, Ring, Cleton-Soeteman and De Bruijn* 32 (1990) 69
Electron spectroscopic diffraction, *Reimer, Fromm and Naundorf* 32 (1990) 80
Energy distribution of electrons transmitted through thin foils, *August and Wernisch* 32 (1990) 113
Plural-scattering deconvolution of electron energy-loss spectra recorded with an angle-limiting aperture, *Egerton and Wang* 32 (1990) 137
Iron $L_{2,3}$ near-edge fine structure studies, *Krishnan* 32 (1990) 309
ELNES of 3d transition-metal oxides. I. Variations across the periodic table, *Krivanek and Paterson* 32 (1990) 313
ELNES of 3d transition-metal oxides. II. Variations with oxidation state and crystal structure, *Paterson and Krivanek* 32 (1990) 319
Energy loss of fast electrons moving near plane boundaries with dispersive media, *Zabala and Echenique* 32 (1990) 327
Multiple scattering correction by a direct convolution method for electron energy loss spectrum, *Wang* 33 (1990) 151
The inelastic contribution to high resolution images of defects, *Krivanek, Ahn and Wood* 33 (1990) 177
Inelastic scattering of high-energy electrons in real space, *Coene and Van Dyck* 33 (1990) 261
Characterisation of zeolite catalysts using electron energy loss spectroscopy, *McComb and Howie* 34 (1990) 84
EELS elemental mapping with unconventional methods. I. Theoretical basis: image analysis with multivariate statistics and entropy concepts, *Trebbia and Bonnet* 34 (1990) 165
EELS elemental mapping with unconventional methods. II. Applications to biological specimens, *Trebbia and Mory* 34 (1990) 179
Energy-loss profiles of transmitted electrons incident on dielectric spheroids, *Illman, Anderson, Warmack and Ferrell* 35 (1991) 1
Measurement of energy deposition in transmission electron microscopy, *Rez and Glaisher* 35 (1991) 65
Support effects on the surface plasmon modes of small particles, *Zabala and Rivacoba* 35 (1991) 145
Effects of energy filtering in LACBED patterns, *Jordan, Rossouw and Vincent* 35 (1991) 237
Electron spectroscopic imaging of dopant precipitation and segregation in silicon, *Frabboni, Lulli, Merli, Migliori and Bauer* 35 (1991) 265
In situ EELS observation of graphite structure modification due to hydrogen ion irradiation, *Kushita and Hojou* 35 (1991) 289
Biological calcium absorption edge imaging using monochromatic synchrotron radiation, *Panessa-Warren, Tortora, Stears and Warren* 36 (1991) 277
Multiple scattering correction by a direct convolution method, *Su and Schattschneider* 36 (1991) 385
Experimental investigation of the ultimate EELS spatial resolution, *Mory, Kohl, Tencé and Colliex* 37 (1991) 191
Energy-loss near-edge fine structure and compositional profiles of cryomilled oxide-dispersion-strengthened aluminum, *Disko, Luton and Shuman* 37 (1991) 202
Electron energy-loss spectrum-imaging, *Hunt and Williams* 38 (1991) 47
Electron Compton scattering with parallel detection: an experiment with very low count rates, *Jonas and Schattschneider* 38 (1991) 117
Energy-filtered convergent-beam electron diffraction in STEM, *Xu, Loane and Silcox* 38 (1991) 127
Towards a practical method for EELS quantification, *Hofer and Luo* 38 (1991) 159
Theory of phase correlations in localized inelastic electron diffraction and imaging, *Wang and Bentley* 38 (1991) 181
Real-space determination of anisotropic electronic structure by electron energy loss spectroscopy, *Browning, Yuan and Brown* 38 (1991) 291
EELS of "thick" specimens, *Egerton, Wang and Chen* 38 (1991) 349
Report of a meeting, *Leapman* 38 (1991) 361
Grooved fluorescent plate for parallel-detection electron energy loss spectroscopy in ultra-high-voltage electron microscopy, *Yoshida, Takaoka, Ura, Katsuta and Matsui* 39 (1991) 45
Factors limiting the spatial resolution and sensitivity of EELS microanalysis in a STEM, *Weiss and Carpenter* 40 (1992) 339

Electron probe microanalysis

Dependence of X-ray detector orientation on Cliff–Lorimer factor for quantitative microanalysis in an electron microscope, *Hashimoto, Wakai and Yamaguchi* 32 (1990) 121
Simultaneous determination of composition and thickness of thin films by X-ray microanalysis at 300 kV and Monte Carlo simulation, *Armigliato and Rosa* 32 (1990) 127

High resolution

The contribution of inelastically scattered electrons to high resolution [110] images of AlAs/GaAs heterostructures, *Boothroyd and Stobbs* 31 (1989) 259

Sub-ångström transmission microscopy: a Fourier transform algorithm for microdiffraction plane intensity information, *Bates and Rodenburg* 31 (1989) 303

Phase transitions in V_2O_5 in a high resolution electron microscope, *Fan and Marks* 31 (1989) 357

The use of high resolution electron microscopy and image simulation to determine the sharpness of InP/GaInAs interfaces in multiple-quantum well structures, *Petford-Long, Booker and Hockly* 31 (1989) 385

High resolution imaging of silicon (111) using a 100 keV STEM, *Xu, Kirkland, Silcox and Keyse* 32 (1990) 93

On the interpretation of high resolution electron microscopy images of premartensitic microstructures in the Ni–Al β_2 phase, *Schryvers and Tanner* 32 (1990) 241

High-resolution electron microscopy studies of Nb/Al_2O_3 interfaces, *Mayer, Flynn and Rühle* 33 (1990) 51

Surface roughness studies in small particles using HREM, *Yacamán, Herrera, Tehuacanero, Gómez and Beltrán del Río* 33 (1990) 133

The inelastic contribution to high resolution images of defects, *Krivanek, Ahn and Wood* 33 (1990) 177

Improvement of resolution by convergent-beam illumination in surface profile images of high resolution transmission electron microscopy, *Mitome, Takayanagi and Tanishiro* 33 (1990) 255

Composition determination from HREM images of substitutional alloys, *De Jong and Van Dyck* 33 (1990) 269

Estimation of allowable errors for tilt parameter determination in protein electron crystallography, *Prasad, Degn, Jeng and Chiu* 33 (1990) 281

High resolution electron microscopy of ceria-supported catalysts, *Cochrane, Hutchison, White, Parkinson, Dupas and Scott* 34 (1990) 10

Vanadium oxide on TiO_2(B) – a HREM study of catalysis by support interaction, *Wallenberg, Andersson and Sanati* 34 (1990) 33

Characterization of surface structure in heterogeneous catalysts by high-resolution transmission electron microscopy, *Datye, Logan, Blankenburg and Smith* 34 (1990) 47

Characterization of filamentous carbon on Ni/MgO catalysts by high-resolution electron microscopy, *Smith, McCartney, Tracz and Borowiecki* 34 (1990) 54

HREM characterization of metal catalysts supported on rare-earth oxides: samarium oxide as support, *Bernal, Botana, Calvino, Cifredo, García and Rodríguez-Izquierdo* 34 (1990) 60

High resolution side-band holography with a STEM instrument, *Cowley* 34 (1990) 293

HREM of epitaxial layers in the InAs/GaAs system, *Karasev, Kiselev, Orlova, Gribelyuk, Gutakovsky, Kanter, Pintus, Rubanov, Stenin and Fedorov* 35 (1991) 11

The influence of non-linear interference processes on the HREM contrast of AlGaAs in ⟨100⟩ projection, *Thoma and Cerva* 35 (1991) 77

Investigation of the atomic structure and visibility of crystal/amorphous interfaces in $Pd_{80}Si_{20}$ alloy by HRTEM image simulations, *Shieh, Stanwood and Howe* 35 (1991) 99

Reconstruction of the exit surface wave function from experimental HRTEM micrographs, *Hohenstein* 35 (1991) 119

Improved transfer of two-dimensional crystals from the air/water interface to specimen support grids for high-resolution analysis by electron microscopy, *Kubalek, Kornberg and Darst* 35 (1991) 295

HREM study of irradiation damage in human dental enamel crystals, *Brès, Hutchison, Senger, Voegel and Frank* 35 (1991) 305

Utility test of imaging plate as a high-resolution image-recording material for radiation-sensitive specimens, *Isoda, Saitoh, Moriguchi and Kobayashi* 35 (1991) 329

Maximum entropy image deconvolution in high resolution electron microscopy, *Hu and Li* 35 (1991) 339

Image resolution enhancement by combining information from electron diffraction pattern and micrograph, *Fan, Xiang, Li, Pan, Uyeda and Fujiyoshi* 36 (1991) 361

High-resolution *Z*-contrast imaging of crystals, *Pennycook and Jesson* 37 (1991) 14

Z-contrast imaging of bulk crystal surfaces in scanning reflection electron microscopy, *Wang and Bentley* 37 (1991) 39

Imaging with high-angle scattered electrons and secondary electrons in the STEM, *Liu and Cowley* 37 (1991) 50

Algorithms for Bayesian background-subtracted Fourier darkfield imaging, *Fraundorf and Pollack* 37 (1991) 72

High-resolution electron microscopy of interfaces in fcc materials, *Merkle* 37 (1991) 130

High-resolution electron microscopy of BN on MgO: a model ceramic–ceramic interface, *Allard, Datye, Nolan, Mahan and Paine* 37 (1991) 153

Characterization of thin films, interfaces and surfaces by high-resolution electron microscopy, *Smith, Li, Lu, McCartney and Tsen* 37 (1991) 169

High-resolution electron microscopy observations of faceted grain boundaries and twins in bismuth-doped copper, *Luzzi* 37 (1991) 180
The theory and practice of high-resolution scanning electron microscopy, *Joy* 37 (1991) 216
High-resolution electron microscopy and microchemical characterization of a polyvinyl alcohol acetate/calcium aluminate composite (macro-defect-free cement), *Popoola, Kriven and Young* 37 (1991) 318
Phase contrast from a regular stacking of equally sized iron-oxide spheres, *Bentzon and Thölén* 38 (1991) 105
New methods for qualitative and quantitative analysis of the GaAs/AlGaAs interface by high-resolution electron microscopy, *Thoma and Cerva* 38 (1991) 265
Ultra-high-resolution HVEM (H-1500) newly constructed at NIRIM. I. Instrumentation, *Matsui, Horiuchi, Bando, Kitami, Yokoyama, Suehara, Matsui and Katsuta* 39 (1991) 8
Quantification in high-resolution electron microscopy with the imaging plate, *Shindo, Hiraga, Oku and Oikawa* 39 (1991) 50
Observations on quick fluctuation of atom images of Si crystal lattice under 800 kV electron irradiation, *Hashimoto, Makita, Yokota, Ikuta, Hashimoto and Hetherington* 39 (1991) 171
HRTEM observation of electron-irradiation-induced defects penetrating through a thin foil of germanium, *Takeda, Hirata, Muto, Hua, Hiraga and Kiritani* 39 (1991) 180
Ultra-high-resolution HVEM (H-1500) newly constructed at NIRIM. II. Applications to materials, *Horiuchi, Matsui, Kitami, Yokoyama, Suehara, Wu, Matsui and Katsuta* 39 (1991) 231
The study of zeolites by HVHREM, *Terasaki, Ohsuna, Alfredsson, Bovin, Watanabe and Tsuno* 39 (1991) 238
Degradation of the high-T_c superconductor $YBa_2Cu_3O_{7-y}$ studied by high-resolution electron microscopy, *Nagakura, Hirotsu, Sasaki, Miyagawa, Nakamura and Brito* 39 (1991) 254
High-resolution electron microscope study of lamellar boundaries in Ti-rich TiAl polysynthetically twinned crystals, *Inui, Nakamura, Oh and Yamaguchi* 39 (1991) 268
HREM study of disclinations in MgCd ordered alloy, *Kitano and Kifune* 39 (1991) 279
UHV microscopy of surfaces, *Ai, Buckett, Dunn, Savage, Zhang and Marks* 39 (1991) 387
In situ HREM study of electron irradiation effects in AgCl microcrystals, *Goessens, Schryvers, Van Landuyt and De Keyzer* 40 (1992) 151
A comparative high-resolution study of interface chemistry in silicon-nitride-based ceramic matrix composites reinforced with silicon carbide whiskers, *Das Chowdhury, Carpenter and Braue* 40 (1992) 229
High-resolution transmission electron microscopy of grain boundaries in aluminum and correlation with atomistic calculations, *Mills, Daw, Thomas and Cosandey* 40 (1992) 247
Morphology of silicon grain boundaries in Sr-modified Al–Si eutectic alloys by HREM, *Shamsuzzoha, Deymier and Smith* 40 (1992) 265
Quantification of atomic-scale grain boundary parameters by high-resolution electron microscopy, *Merkle* 40 (1992) 281
High-resolution electron microscopy of planar inversion domain boundaries in aluminum nitride, *McCartney, Youngman and Teller* 40 (1992) 291
High-resolution electron microscopy study of ALMBE InAs grown on (001) GaAs substrates, *Molina, Aragón, Petford-Long and García* 40 (1992) 370

High voltage

High-energy electron diffraction from transverse stacking faults in the projection approximation, *Jesson and Steeds* 31 (1989) 399
Design concept of a new ultra-high-voltage electron microscope at Osaka University, *Ura* 39 (1991) 1
Ultra-high-resolution HVEM (H-1500) newly constructed at NIRIM. I. Instrumentation, *Matsui, Horiuchi, Bando, Kitami, Yokoyama, Suehara, Matsui and Katsuta* 39 (1991) 8
Recent evolution of HVEM in France, *Jouffrey* 39 (1991) 21
High-voltage electron microscopy in the Federal Republic of Germany: past, present and future, *Seeger and Phillipp* 39 (1991) 32
Grooved fluorescent plate for parallel-detection electron energy loss spectroscopy in ultra-high-voltage electron microscopy, *Yoshida, Takaoka, Ura, Katsuta and Matsui* 39 (1991) 45
Convergent beam electron diffraction in the high-voltage electron microscope with continuously variable reference voltage for lenses and alignments, *Kuroda, Morita, Arai, Yokoi and Saka* 39 (1991) 58
High-voltage electron diffraction study of structure factors of Pd and Pt, *Matsumura, Ohboshi, Oki and Tomokiyo* 39 (1991) 65
Recent progress in in-situ deformation experiments in HVEM, *Saka and Teshima* 39 (1991) 81

Some aspects of HVEM in the study of materials, *Goringe* 39 (1991) 100
History, present status and future of the contribution of high-voltage electron microscopy to the study of radiation damage and defects in solids, *Kiritani* 39 (1991) 135
Characterization of Czochralski Si crystals by HVEM, *Oshima and Hua* 39 (1991) 160
Observations on quick fluctuation of atom images of Si crystal lattice under 800 kV electron irradiation, *Hashimoto, Makita, Yokota, Ikuta, Hashimoto and Hetherington* 39 (1991) 171
Radiation-induced solute segregation in Al and Ni binary alloys under HVEM irradiation, *Ezawa and Wakai* 39 (1991) 187
Ultra-high-resolution HVEM (H-1500) newly constructed at NIRIM. II. Applications to materials, *Horiuchi, Matsui, Kitami, Yokoyama, Suehara, Wu, Matsui and Katsuta* 39 (1991) 231
The study of zeolites by HVHREM, *Terasaki, Ohsuna, Alfredsson, Bovin, Watanabe and Tsuno* 39 (1991) 238
A new 1000 kV HREM for organic crystal study, *Isoda, Moriguchi, Kurata, Kobayashi and Uyeda* 39 (1991) 247
The evolution of HVEM application in Antwerp, *Van Landuyt* 39 (1991) 287
Stereoscopic observation and determination of surface orientation of voids in stress-thermal-migrated-aluminum lines of LSI with UHVEM, *Takaoka and Ura* 39 (1991) 299
HVEM observations of stress-induced voiding in Al lines for LSI, *Okabayashi, Tanikawa, Mori and Fujita* 39 (1991) 306
Cross-sectional observations of gold–silicon reaction on silicon substrate in situ in the high-voltage electron microscope, *Sumida and Ikeda* 39 (1991) 313
The study of self-organization processes in crystals by high-voltage electron microscopy, *Seeger, Jin, Phillipp and Zaiser* 39 (1991) 342
Formation of non-equilibrium solid phases by high-energy electron irradiation, *Mori and Fujita* 39 (1991) 355
A study of amorphization and microstructural evolution of graphite under electron or ion irradiation, *Nakai, Kinoshita and Matsunaga* 39 (1991) 361
Atom clusters – new applications of high-voltage electron microscopy "micro-laboratory" to materials science, *Fujita* 39 (1991) 369
Observations by HVEM of atomic clusters embedded in MgO crystals, *Tanaka, Kimoto and Mihama* 39 (1991) 395

Historical

Historical perspective and current trends in emission microscopy, mirror electron microscopy and low-energy electron microscopy, *Griffith and Engel* 36 (1991) 1
Recent evolution of HVEM in France, *Jouffrey* 39 (1991) 21
High-voltage electron microscopy in the Federal Republic of Germany: past, present and future, *Seeger and Phillipp* 39 (1991) 32
The evolution of HVEM application in Antwerp, *Van Landuyt* 39 (1991) 287

Image processing, 3D reconstruction

Three-dimensional reconstruction from two-dimensional projections with unknown orientation, position and projection axis (*Erratum*), *Van Dyck* 31 (1989) 258
Maximum entropy methods and dark field microscopy images, *Farrow and Ottensmeyer* 31 (1989) 275
The application of the maximum entropy method to electron microscopic tomography, *Lawrence, Jaffer and Sewell* 31 (1989) 285
Automatic selection of macromolecules from electron micrographs by component labelling and symbolic processing, *Harauz and Fong-Lochovsky* 31 (1989) 333
Approximation of missing-cone data in 3D electron microscopy, *Barth, Bryan and Hegerl* 31 (1989) 365
The use of high resolution electron microscopy and image simulation to determine the sharpness of InP/GaInAs interfaces in multiple-quantum well structures, *Petford-Long, Booker and Hockly* 31 (1989) 385
Simulating high-angle annular dark-field STEM images including inelastic thermal diffuse scattering, *Wang and Cowley* 31 (1989) 437
Computerized three-dimensional reconstructions of serial sections in electron microscopy, *Kriete and Magdowski* 32 (1990) 48
Image processing of partially periodic lattice images of polymers: the study of crystal defects, *Pradère and Thomas* 32 (1990) 149
Invariant classification of molecular views in electron micrographs, *Schatz and Van Heel* 32 (1990) 255
An image and spectrum acquisition system for a VG HB501 STEM using a color graphics workstation, *Kirkland* 32 (1990) 349
On the calculation of electron microscope images of holes and spherical inclusions using the multi-slice method, *Scheerschmidt and Hillebrand* 33 (1990) 27

Three-dimensional interactive graphics for displaying and modelling microscopic data, *Basinski and Deatherage* 33 (1990) 167
Representation of rotations by unit quaternions, *Harauz* 33 (1990) 209
Direct phase determination in electron crystallography: the crystal structure of an *n*-paraffin, *Dorset and Zemlin* 33 (1990) 227
Composition determination from HREM images of substitutional alloys, *De Jong and Van Dyck* 33 (1990) 269
Estimation of allowable errors for tilt parameter determination in protein electron crystallography, *Prasad, Degn, Jeng and Chiu* 33 (1990) 281
Filtered back projection on shared-memory multiprocessors, *Zapata, Carazo, Benavides, Walther and Peskin* 34 (1990) 271
Reconstruction of the exit surface wave function from experimental HRTEM micrographs, *Hohenstein* 35 (1991) 119
Contrast simulation of high resolution electron holography on surface structures, *Tanji, Ito and Yada* 35 (1991) 245
A computer-aided control, design and image-processing system for electron microscopes, *Habliston, Baker, Griffith and Skoczylas* 36 (1991) 222
Is electron crystallography possible? The direct determination of organic crystal structures, *Dorset* 38 (1991) 23
A fast algorithm for transposing large multidimensional image data sets, *Van Heel* 38 (1991) 75
A protocol for 3D image reconstruction from a single image of an oblique section, *Taylor and Crowther* 38 (1991) 85
Covering events in eigenimages of biomolecules, *Harauz and Chiu* 38 (1991) 305
Image processing in TEM using the wavelet transform, *Beltrán del Río, Gómez and José-Yacamán* 38 (1991) 319
Preface to Novel Methods of Analysis in 2D and 3D Microscopy, *Frank* 40 (1992) vii
New applications of multivariate statistical analysis in spectroscopy and microscopy, *Bonnet, Simova, Lebonvallet and Kaplan* 40 (1992) 1
Detection, classification and 3D reconstruction of biological macromolecules on hypercube computers, *Carazo, Benavides, Rivera and Zapata* 40 (1992) 13
Three-dimensional reconstruction of single particles embedded in ice, *Penczek, Radermacher and Frank* 40 (1992) 33
An overview of convex projections theory and its application to image recovery problems, *Sezan* 40 (1992) 55
Towards automatic electron tomography, *Dierksen, Typke, Hegerl, Koster and Baumeister* 40 (1992) 71

Imaging

Identification of precipitable Ca^{2+} by electron spectroscopic imaging and electron energy loss spectroscopy in the organ of Corti of the guinea pig, *Heinrich, Drechsler, Kreutz and Mann* 32 (1990) 1
Calcium compartmentation in Antarctic brown algae, *Döpfner, Wiencke and Kirst* 32 (1990) 7
Cytochemical localization of calcium in the central nervous system of vertebrates, *Körtje, Freihöfer and Rahmann* 32 (1990) 12
Ultrastructural localization of aluminium in amphibian larvae, *Böhmer and Rahmann* 32 (1990) 18
Preparation of plant material for elemental analysis using ESI and EELS techniques, *Lehmann, Kramer, Schulz and Probst* 32 (1990) 26
Electron spectroscopic imaging (ESI) of viruses using thin-section and immunolabelling preparations, *Özel, Pauli and Gelderblom* 32 (1990) 35
Contrast tuning by electron spectroscopic imaging of half-micrometer-thick sections of nervous tissue, *Wagner* 32 (1990) 42
Quantitative energy-filtered image analysis in cytochemistry. I. Morphometric analysis of contrast-related images, *Sorber, De Jong, Den Breejen and De Bruijn* 32 (1990) 55
Quantitative energy-filtered image analysis in cytochemistry. II. Morphometric analysis of element-distribution images, *Sorber, Van Dort, Ring, Cleton-Soeteman and De Bruijn* 32 (1990) 69
The inelastic contribution to high resolution images of defects, *Krivanek, Ahn and Wood* 33 (1990) 177
Quantitative chemical lattice imaging: theory and practice, *Ourmazd, Baumann, Bode and Kim* 34 (1990) 237
Electron beam deflection by a dielectric wedge, *Martínez-Torregrosa, Garcia-Molina and Gras-Martí* 34 (1990) 283
Spot-scan imaging of microcrystals of an influenza neuraminidase–antibody fragment complex, *Bullough and Tulloch* 35 (1991) 131
Plan-view diffraction contrast imaging of surface-relaxation effects from strained-layer superlattices, *Perovic and Weatherly* 35 (1991) 271
Biological calcium absorption edge imaging using monochromatic synchrotron radiation, *Panessa-Warren, Tortora, Stears and Warren* 36 (1991) 277

High-resolution Z-contrast imaging of crystals, *Pennycook and Jesson* 37 (1991) 14
Z-contrast imaging of bulk crystal surfaces in scanning reflection electron microscopy, *Wang and Bentley* 37 (1991) 39
On the symmetry characteristics of diffraction contrast images of microtwins, *Sheinin and Kim* 37 (1991) 116
Optimum focus for taking electron holograms, *Lichte* 38 (1991) 13
Phase contrast from a regular stacking of equally sized iron-oxide spheres, *Bentzon and Thölén* 38 (1991) 105
Theory of phase correlations in localized inelastic electron diffraction and imaging, *Wang and Bentley* 38 (1991) 181
Incoherent imaging of zone axis crystals with ADF STEM, *Loane, Xu and Silcox* 40 (1992) 121

Instrumentation

Pointed filament illumination characteristics, *Hines* 31 (1989) 319
Recent developments in electron-optical instrumentation and computer-aided design, *Mulvey and Tahir* 33 (1990) 1
Direct parallel detection of energy-resolved large-angle convergent-beam patterns, *Quandt, La Barré and Niedrig* 33 (1990) 15
A simple, inexpensive saddle-field ion gun for the preparation of TEM specimens, *Garulli and Corticelli* 34 (1990) 299
A side-entry cold holder for cryo-electron microscopy, *Henderson, Raeburn and Vigers* 35 (1991) 45
An electronic image drift compensator for electron microscopy, *Cattermole and Henderson* 35 (1991) 55
Design and development of an ultrahigh vacuum high-resolution transmission electron microscope, *Kondo, Ohi, Ishibashi, Hirano, Harada, Takayanagi, Tanishiro, Kobayashi and Yagi* 35 (1991) 111
Active compensation of ambient AC magnetic fields for high-resolution electron microscopy, *Ostrowski and Mallett* 35 (1991) 151
Improved transfer of two-dimensional crystals from the air/water interface to specimen support grids for high-resolution analysis by electron microscopy, *Kubalek, Kornberg and Darst* 35 (1991) 295
Scanning versus direct imaging emission microscopy, *Veneklasen* 36 (1991) 63
Design of a spectroscopic low-energy electron microscope, *Veneklasen* 36 (1991) 76
Low-energy electron microscope of novel design, *Liebl and Senftinger* 36 (1991) 91
Design of a new photo-emission/low-energy electron microscope for surface studies, *Tromp and Reuter* 36 (1991) 99
Design features of an ultrahigh-vacuum electron microscope for REM-PEEM studies of surfaces, *Kondo, Yagi, Kobayashi, Kobayashi, Yanaka, Kise and Ohkawa* 36 (1991) 142
Design and performance of a high-resolution photoelectron microscope, *Rempfer, Skoczylas and Griffith* 36 (1991) 196
A proposed modular imaging system for photoelectron and electron probe microscopy with aberration correction, and for mirror microscopy and low-energy electron microscopy, *Skoczylas, Rempfer and Griffith* 36 (1991) 252
A study of small electron probe formation in a field emission gun TEM/STEM, *Weiss, Carpenter and Higgs* 36 (1991) 319
Performance of electron image converters with YAG single-crystal screen and CCD sensor, *Daberkow, Herrmann, Liu and Rau* 38 (1991) 215
Development of a superfluid helium stage for high-resolution electron microscopy, *Fujiyoshi, Mizusaki, Morikawa, Yamagishi, Aoki, Kihara and Harada* 38 (1991) 241
Design concept of a new ultra-high-voltage electron microscope at Osaka University, *Ura* 39 (1991) 1
Ultra-high-resolution HVEM (H-1500) newly constructed at NIRIM. I. Instrumentation, *Matsui, Horiuchi, Bando, Kitami, Yokoyama, Suehara, Matsui and Katsuta* 39 (1991) 8
Ultra-high-resolution HVEM (H-1500) newly constructed at NIRIM. II. Applications to materials, *Horiuchi, Matsui, Kitami, Yokoyama, Suehara, Wu, Matsui and Katsuta* 39 (1991) 231
A new 1000 kV HREM for organic crystal study, *Isoda, Moriguchi, Kurata, Kobayashi and Uyeda* 39 (1991) 247

Low energy electron microscopy, photoemission microscopy

Surface studies by low-energy electron microscopy (LEEM) and conventional UV photoemission electron microscopy (PEEM), *Bauer, Mundschau, Swiech and Telieps* 31 (1989) 49
Historical perspective and current trends in emission microscopy, mirror electron microscopy and low-energy electron microscopy, *Griffith and Engel* 36 (1991) 1
Emission microscopy and surface science, *Mundschau* 36 (1991) 29

The possibilities for analytical methods in photoemission and low-energy microscopy, *Bauer* 36 (1991) 52
Scanning versus direct imaging emission microscopy, *Veneklasen* 36 (1991) 63
Design of a spectroscopic low-energy electron microscope, *Veneklasen* 36 (1991) 76
Low-energy electron microscope of novel design, *Liebl and Senftinger* 36 (1991) 91
Design of a new photo-emission/low-energy electron microscope for surface studies, *Tromp and Reuter* 36 (1991) 99
The scanning photoemission microscope: a novel tool in surface science, *Von Oertzen, Rotermund, Jakubith and Ertl* 36 (1991) 107
Synchrotron-based imaging with a magnetic projection photoelectron microscope, *King, Borg, Kim, Yoshikawa, Pianetta and Lindau* 36 (1991) 117
Photoelectron holography for high resolution spectromicroscopy, *Tonner* 36 (1991) 130
A UHV-compatible photoelectron emission microscope for applications in surface science, *Engel, Kordesch, Rotermund, Kubala and Von Oertzen* 36 (1991) 148
The morphology of carbon films and surfaces studied by photoemission electron microscopy, *Wang and Kordesch* 36 (1991) 154
Methods and application of UV photoelectron microscopy in heterogeneous catalysis, *Rotermund, Engel, Jakubith, Von Oertzen and Ertl* 36 (1991) 164
Photoemission electron microscopy in metallurgical research: applications using the Balzers KE3 Metioscope, *Hammond and Imam* 36 (1991) 173
Nonlinear organic photoemitters: their properties and possible applications in electron microscopy, *Massey, Ash and Zhou* 36 (1991) 186
Design and performance of a high-resolution photoelectron microscope, *Rempfer, Skoczylas and Griffith* 36 (1991) 196
Biological applications of photoelectron imaging: a practical perspective, *Birrell, Hedberg, Habliston and Griffith* 36 (1991) 235
A proposed modular imaging system for photoelectron and electron probe microscopy with aberration correction, and for mirror microscopy and low-energy electron microscopy, *Skoczylas, Rempfer and Griffith* 36 (1991) 252
Bibliography on emission microscopy, mirror electron microscopy, low-energy electron microscopy and related techniques: 1985–1991, *Griffith, Habliston and Birrel* 36 (1991) 262

Methods and techniques

Silicon oxidation studied by in-situ TEM, *Gibson and Lanzerotti* 31 (1989) 29
Surface faceting and the equilibrium crystal shape, *Williams and Bartelt* 31 (1989) 36
Using ELNES with parallel EELS for differentiating between a-Si:X thin films, *Auchterlonie, McKenzie and Cockayne* 31 (1989) 217
Self-consistent solution of the reflection diffraction problem, *Marks and Ma* 31 (1989) 241
Pointed filament illumination characteristics, *Hines* 31 (1989) 319
Automatic selection of macromolecules from electron micrographs by component labelling and symbolic processing, *Harauz and Fong-Lochovsky* 31 (1989) 333
Evaporated carbon stabilizes thin, frozen-hydrated specimens, *Jakubowski, Baumeister and Glaeser* 31 (1989) 351
Low-energy electron and ion projection microscopy, *Stocker, Fink and Morin* 31 (1989) 379
Plural-scattering deconvolution of electron energy-loss spectra recorded with an angle-limiting aperture, *Egerton and Wang* 32 (1990) 137
Identification of the Laue zone number in hcp systems in convergent beam electron diffraction, *Jackson* 32 (1990) 181
The measurement of the roughness of W/Si multilayers using the Fresnel Method, *Shih and Stobbs* 32 (1990) 219
Two-dimensional crystallization of proteins on mercury, *Yoshimura, Matsumoto, Endo and Nagayama* 32 (1990) 265
On the Fresnel-fringe technique for the analysis of interfacial films, *Rasmussen and Carter* 32 (1990) 337
An image and spectrum acquisition system for a VG HB501 STEM using a color graphics workstation, *Kirkland* 32 (1990) 349
On the calculation of electron microscope images of holes and spherical inclusions using the multi-slice method, *Scheerschmidt and Hillebrand* 33 (1990) 27
Preface to Scanning Tunneling Microscopy and Related Techniques, *Isaacson* 33 (1990) 65
Electrochemical deposition of molecular adsorbates for in situ scanning probe microscopy, *Nagahara, Thundat, Oden, Lindsay and Rill* 33 (1990) 107
Convergent-beam electron diffraction characterization of dislocations in GaS single crystals, *De Blasi, Manno and Rizzo* 33 (1990) 143
Multiple scattering correction by a direct convolution method for electron energy loss spectrum, *Wang* 33 (1990) 151

Three-dimensional interactive graphics for displaying and modelling microscopic data, *Basinski and Deatherage* 33 (1990) 167
Absorption and fluorescence corrections for X-ray analysis with large-solid-angle detectors: thin films and spheres, *Zreiba and Kelly* 33 (1990) 187
Experimental determination of the efficiency function of an X-ray detector using submicron spheres, *Zreiba and Kelly* 33 (1990) 199
Defocus determination in the STEM by phase contrast methods, *Hammel, Colliex, Mory, Kohl and Rose* 34 (1990) 257
Filtered back projection on shared-memory multiprocessors, *Zapata, Carazo, Benavides, Walther and Peskin* 34 (1990) 271
TEM evaluation of absorption parameters using a particularly suitable Faraday cage: comparison with previous methods, *Martinelli and Sacerdoti* 34 (1990) 289
A new form of the extrapolation method for absorption correction in quantitative X-ray microanalysis with the analytical electron microscope, *Horita, Sano and Nemoto* 35 (1991) 27
Alignment of tomographic projections using an incomplete set of fiducial markers, *Jing and Sachs* 35 (1991) 37
Spot-scan imaging of microcrystals of an influenza neuraminidase–antibody fragment complex, *Bullough and Tulloch* 35 (1991) 131
Active compensation of ambient AC magnetic fields for high-resolution electron microscopy, *Ostrowski and Mallett* 35 (1991) 151
Maximum entropy image deconvolution in high resolution electron microscopy, *Hu and Li* 35 (1991) 339
A computer-aided control, design and image-processing system for electron microscopes, *Habliston, Baker, Griffith and Skoczylas* 36 (1991) 222
Use of Kikuchi line intersections in crystal symmetry determination: application to chalcopyrite structure, *Baba-Kishi* 36 (1991) 355
Image resolution enhancement by combining information from electron diffraction pattern and micrograph, *Fan, Xiang, Li, Pan, Uyeda and Fujiyoshi* 36 (1991) 361
Determination of the effective source from its image in the backfocal plane of the objective lens, *Hosokawa, Suzuki and Ibe* 36 (1991) 367
Frontiers of electron microscopy in materials science, *Hirsch* 37 (1991) 1
A new in situ technique for studying deformation and fracture in thin film ductile/brittle laminates, *Hackney and Milligan* 37 (1991) 79
HVEM studies of the sintering of MgO nanocrystals prepared by $Mg(OH)_2$ decomposition, *Thangaraj, Westmacott and Dahmen* 37 (1991) 362
Optimum focus for taking electron holograms, *Lichte* 38 (1991) 13
A fast algorithm for transposing large multi-dimensional image data sets, *Van Heel* 38 (1991) 75
Displacement field analysis: calculation of distortion measures from displacement maps, *Dürr* 38 (1991) 135
Small-angle cleavage of semiconductors for transmission electron microscopy, *McCaffrey* 38 (1991) 149
Towards a practical method for EELS quantification, *Hofer and Luo* 38 (1991) 159
Improved methods for the determination of the spherical aberration coefficient in high resolution electron microscopy from micrographs of an amorphous object, *Coene and Denteneer* 38 (1991) 225
Measurement of the spherical aberration coefficient of transmission electron microscopes by beam-tilt-induced image displacements, *Koster and De Jong* 38 (1991) 235
New methods for qualitative and quantitative analysis of the GaAs/AlGaAs interface by high-resolution electron microscopy, *Thoma and Cerva* 38 (1991) 265
In situ deformation of proton-irradiated metals, *Suzuki, Fujimura, Sato, Nagakawa, Yamamoto and Shiraishi* 39 (1991) 92
In situ investigations of plastic deformation and pseudo-elasticity of zirconia ceramics, *Komatsu and Fujita* 39 (1991) 105
New applications of multivariate statistical analysis in spectroscopy and microscopy, *Bonnet, Simova, Lebonvallet and Kaplan* 40 (1992) 1
Detection, classification and 3D reconstruction of biological macromolecules on hypercube computers, *Carazo, Benavides, Rivera and Zapata* 40 (1992) 13
Towards automatic electron tomography, *Dierksen, Typke, Hegerl, Koster and Baumeister* 40 (1992) 71
Practical autoalignment of transmission electron microscopes, *Koster and De Ruijter* 40 (1992) 89
Measurement of spherical aberration in STEM, *Wong, Kirkland, Xu, Loane and Silcox* 40 (1992) 139
De-channelling contrast in annular dark-field STEM, *Cowley and Huang* 40 (1992) 171
A technique for fabrication of textured thin carbon substrates, *Reznik and Isaacson* 40 (1992) 181
New life for unusable electropolished TEM foils, *Smith-Wackerle and Trybus* 40 (1992) 187

Boundary characterisation methods using the TEM, *Stobbs* 40 (1992) 300
Application of the in situ TEM deformation technique to observe how "clean" and doped grain boundaries respond to local stress concentrations, *Robertson, Lee and Birnbaum* 40 (1992) 330
High-angle annular dark-field microscopy of Mo/Si multilayer structures, *Liu, Cheng, Cowley and Stearns* 40 (1992) 352

New developments

Three-dimensional reconstruction from two-dimensional projections with unknown orientation, position and projection axis (*Erratum*), *Van Dyck* 31 (1989) 258
Sub-ångström transmission microscopy: a Fourier transform algorithm for micro-diffraction plane intensity information, *Bates and Rodenburg* 31 (1989) 303
Low-energy electron and ion projection microscopy, *Stocker, Fink and Morin* 31 (1989) 379
Electron holograms for subångström point resolution, *Völkl and Lichte* 32 (1990) 177
Recent developments in electron-optical instrumentation and computer-aided design, *Mulvey and Tahir* 33 (1990) 1
TEM in-situ investigations of the crystallization behaviour of amorphous silicon thin films, *Reiche and Hopfe* 33 (1990) 41
The atomic force microscope: a tool for science and industry, *Gould, Drake, Prater, Weisenhorn, Manne, Kelderman, Butt, Hansma, Hansma, Magonov and Cantow* 33 (1990) 93
Representation of rotations by unit quaternions, *Harauz* 33 (1990) 209
TEM evaluation of absorption parameters using a particularly suitable Faraday cage: comparison with previous methods, *Martinelli and Sacerdoti* 34 (1990) 289
High resolution side-band holography with a STEM instrument, *Cowley* 34 (1990) 293
A simple, inexpensive saddle-field ion gun for the preparation of TEM specimens, *Garulli and Corticelli* 34 (1990) 299
An electronic image drift compensator for electron microscopy, *Cattermole and Henderson* 35 (1991) 55
Atomic-force microscopy of synthetic ultrafiltration membranes in air and under water, *Dietz, Hansma, Herrmann, Inacker and Lehmann* 35 (1991) 155
Automated structure factor refinement from convergent beam patterns, *Zuo and Spence* 35 (1991) 185
The use of the Fresnel Method for the characterisation of a short-period strained Ge/Si multilayer. I. Measurement of the average Ge/Si volume ratio, *Shih and Stobbs* 35 (1991) 197
The use of the Fresnel Method for the characterisation of a short-period strained Ge/Si multilayer. II. Measurement of a layer-thickness irregularity, *Shih and Stobbs* 35 (1991) 217
Contrast simulation of high resolution electron holography on surface structures, *Tanji, Ito and Yada* 35 (1991) 245
Photoelectron holography for high resolution spectromicroscopy, *Tonner* 36 (1991) 130
Design and performance of a high-resolution photoelectron microscope, *Rempfer, Skoczylas and Griffith* 36 (1991) 196
A proposed modular imaging system for photoelectron and electron probe microscopy with aberration correction, and for mirror microscopy and low-energy electron microscopy, *Skoczylas, Rempfer and Griffith* 36 (1991) 252
Frontiers of electron microscopy in materials science, *Hirsch* 37 (1991) 1
Electron crystallography at atomic resolution: ab initio structure analysis of copper perchlorophthalocyanine, *Dorset, Tivol and Turner* 38 (1991) 41
Electron energy-loss spectrum-imaging, *Hunt and Williams* 38 (1991) 47
A protocol for 3D image reconstruction from a single image of an oblique section, *Taylor and Crowther* 38 (1991) 85
Electron Compton scattering with parallel detection: an experiment with very low count rates, *Jonas and Schattschneider* 38 (1991) 117
Improved methods for the determination of the spherical aberration coefficient in high resolution electron microscopy from micrographs of an amorphous object, *Coene and Denteneer* 38 (1991) 225
Measurement of the spherical aberration coefficient of transmission electron microscopes by beam-tilt-induced image displacements, *Koster and De Jong* 38 (1991) 235
Development of a superfluid helium stage for high-resolution electron microscopy, *Fujiyoshi, Mizusaki, Morikawa, Yamagishi, Aoki, Kihara and Harada* 38 (1991) 241
Electrochemically induced adsorption of radio-labeled DNA on gold and HOPG substrates for STM investigations, *Brown, Allison, Warmack, Jacobson, Larimer, Woychik and Carrier* 38 (1991) 253
New methods for qualitative and quantitative analysis of the GaAs/AlGaAs interface by high-resolution electron microscopy, *Thoma and Cerva* 38 (1991) 265

Scanned-tip reflection-mode near-field scanning optical microscopy, *Cline, Barhatzky and Isaacson* 38 (1991) 299
Design concept of a new ultra-high-voltage electron microscope at Osaka University, *Ura* 39 (1991) 1
Ultra-high-resolution HVEM (H-1500) newly constructed at NIRIM. I. Instrumentation, *Matsui, Horiuchi, Bando, Kitami, Yokoyama, Suehara, Matsui and Katsuta* 39 (1991) 8
Convergent beam electron diffraction in the high-voltage electron microscope with continuously variable reference voltage for lenses and alignments, *Kuroda, Morita, Arai, Yokoi and Saka* 39 (1991) 58
Recent progress in in-situ deformation experiments in HVEM, *Saka and Teshima* 39 (1991) 81
Ultra-high-resolution HVEM (H-1500) newly constructed at NIRIM. II. Applications to materials, *Horiuchi, Matsui, Kitami, Yokoyama, Suehara, Wu, Matsui and Katsuta* 39 (1991) 231
A new 1000 kV HREM for organic crystal study, *Isoda, Moriguchi, Kurata, Kobayashi and Uyeda* 39 (1991) 247
Atom clusters – new applications of high-voltage electron microscopy "micro-laboratory" to materials science, *Fujita* 39 (1991) 369
New applications of multivariate statistical analysis in spectroscopy and microscopy, *Bonnet, Simova, Lebonvallet and Kaplan* 40 (1992) 1
An overview of convex projections theory and its application to image recovery problems, *Sezan* 40 (1992) 55
Towards automatic electron tomography, *Dierksen, Typke, Hegerl, Koster and Baumeister* 40 (1992) 71
Practical autoalignment of transmission electron microscopes, *Koster and De Ruijter* 40 (1992) 89
From single defects to a structure–property relationship for polycrystals, *Smith* 40 (1992) 321

Particle optics, experimental

A study of small electron probe formation in a field emission gun TEM/STEM, *Weiss, Carpenter and Higgs* 36 (1991) 319
Determination of the effective source from its image in the backfocal plane of the objective lens, *Hosokawa, Suzuki and Ibe* 36 (1991) 367

Particle optics, theory

Calculation of the angular and energy distribution of multiple scattered electrons using Fourier transforms, *Reimer* 31 (1989) 169
On the resolution of the low-energy electron reflection microscope based on wave electron optics, *Shao and Crewe* 31 (1989) 199

Radiation damage and contamination

Safe limits for electron beam analysis of copper oxides, *Petford-Long and Long* 34 (1990) 27
Electron radiation damage of α-alumina, *Bonevich and Marks* 35 (1991) 161
HREM study of irradiation damage in human dental enamel crystals, *Brès, Hutchison, Senger, Voegel and Frank* 35 (1991) 305
Utility test of imaging plate as a high-resolution image-recording material for radiation-sensitive specimens, *Isoda, Saitoh, Moriguchi and Kobayashi* 35 (1991) 329
Temperature directly affects the rate of irradiation-induced mass loss from phosphatidylcholine multilayers, *Lamvik, Magid, Davilla and Córdova* 35 (1991) 351
Electron-beam-induced transformations of gold particles epitaxially grown on MgO microcubes, *Giorgio, Henry, Chapon, Nihoul and Penisson* 38 (1991) 1
In situ deformation of proton-irradiated metals, *Suzuki, Fujimura, Sato, Nagakawa, Yamamoto and Shiraishi* 39 (1991) 92
History, present status and future of the contribution of high-voltage electron microscopy to the study of radiation damage and defects in solids, *Kiritani* 39 (1991) 135
HRTEM observation of electron-irradiation-induced defects penetrating through a thin foil of germanium, *Takeda, Hirata, Muto, Hua, Hiraga and Kiritani* 39 (1991) 180
Radiation-induced solute segregation in Al and Ni binary alloys under HVEM irradiation, *Ezawa and Wakai* 39 (1991) 187
In-situ observation of defect cluster formation in metal and alloy under electron/ion dual-beam irradiation, *Ohnuki, Hidaka and Takahashi* 39 (1991) 197
Accumulation and annihilation processes of cascades in metallic and nonmetallic crystals under irradiation with ions and/or electrons, *Kinoshita, Abe, Fukumoto, Nakai and Shinohara* 39 (1991) 205
Defects occurring at or near surfaces in α-Al_2O_3 during electron irradiation, *Tomokiyo, Kuroiwa and Kinoshita* 39 (1991) 213
In situ study of effects of ion irradiation on solid-state crystallization of cobalt disilicide thin films, *Allen and Smith* 39 (1991) 222
Degradation of the high-T_c superconductor $YBa_2Cu_3O_{7-y}$ studied by high-resolution electron microscopy, *Nagakura, Hirotsu, Sasaki, Miyagawa, Nakamura and Brito* 39 (1991) 254
HVEM observations of stress-induced voiding in Al lines for LSI, *Okabayashi, Tanikawa, Mori and Fujita* 39 (1991) 306

Structural and valence electronic analysis of electron-irradiation-induced foreign-atom implantation by a combination of UHVEM and AES, *Yasuda, Sakata and Mori* 39 (1991) 321
The study of self-organization processes in crystals by high-voltage electron microscopy, *Seeger, Jin, Phillipp and Zaiser* 39 (1991) 342
Formation of non-equilibrium solid phases by high-energy electron irradiation, *Mori and Fujita* 39 (1991) 355
A study of amorphization and microstructural evolution of graphite under electron or ion irradiation, *Nakai, Kinoshita and Matsunaga* 39 (1991) 361
In situ HREM study of electron irradiation effects in AgCl microcrystals, *Goessens, Schryvers, Van Landuyt and De Keyzer* 40 (1992) 151
Effect of temperature on radiation damage to aromatic organic molecules, *Fryer, McConnell, Zemlin and Dorset* 40 (1992) 163

Reflection electron microscopy, reflection high-energy electron diffraction

Dynamic observation of gold adsorption on Si(111)7 × 7 surface by high-resolution reflection electron microscopy, *Tanishiro and Takayanagi* 31 (1989) 20
The parabolas and circles in RHEED patterns, *Yao and Cowley* 31 (1989) 149
On the resolution of the low-energy electron reflection microscope based on wave electron optics, *Shao and Crewe* 31 (1989) 199
RHEED calculations for non-symmetrical incidence close to a surface Bragg condition, *Smith* 31 (1989) 431
Illumination of crystal surfaces in the electron microscope under RHEED and REM geometry, *Peng* 32 (1990) 169
Comparison of surface step images in reflection electron microscopy and scanning reflection electron microscopy, *Banzhof and Herrmann* 33 (1990) 23
Observation of the graphite surface by reflection electron microscopy during STM operation, *Spence, Lo and Kuwabara* 33 (1990) 69
Electron diffraction conditions and surface imaging in reflection electron microscopy, *Yao and Cowley* 33 (1990) 237
A study of directly recorded RHEED and BKD patterns in the SEM, *Baba-Kishi* 34 (1990) 205
Design features of an ultrahigh-vacuum electron microscope for REM-PEEM studies of surfaces, *Kondo, Yagi, Kobayashi, Kobayashi, Yanaka, Kise and Ohkawa* 36 (1991) 142
Z-contrast imaging of bulk crystal surfaces in scanning reflection electron microscopy, *Wang and Bentley* 37 (1991) 39

Scanning electron microscopy

High resolution secondary electron imaging and spectroscopy, *Bleloch, Howie and Milne* 31 (1989) 99
Biassed secondary electron imaging in a UHV-STEM, *Hembree, Crozier, Drucker, Krishnamurthy, Venables and Cowley* 31 (1989) 111
Biassed secondary electron imaging of Ag/Si(111), *Doust, Metcalfe and Venables* 31 (1989) 116
High-angle ADF and high-resolution SE imaging of supported catalyst clusters, *Liu and Cowley* 34 (1990) 119
A study of directly recorded RHEED and BKD patterns in the SEM, *Baba-Kishi* 34 (1990) 205
Artifacts of specimen charging in X-ray microanalysis in the scanning electron microscope, *Miller* 35 (1991) 357
The theory and practice of high-resolution scanning electron microscopy, *Joy* 37 (1991) 216
Scanning electron microscopy of tribochemical films on Si_3N_4 to H_2O at high temperatures, *Danyluk, Park and McNallan* 37 (1991) 239

Scanning transmission electron microscopy

SEM studies of equilibrium forms: roughening transition and surface melting of indium and lead crystals, *Métois and Heyraud* 31 (1989) 73
Biassed secondary electron imaging in a UHV-STEM, *Hembree, Crozier, Drucker, Krishnamurthy, Venables and Cowley* 31 (1989) 111
On the HOLZ contribution to STEM lattice images formed using high-angle dark-field detectors, *Spence, Zuo and Lynch* 31 (1989) 233
Simulating high-angle annular dark-field STEM images including inelastic thermal diffuse scattering, *Wang and Cowley* 31 (1989) 437
High resolution imaging of silicon (111) using a 100 keV STEM, *Xu, Kirkland, Silcox and Keyse* 32 (1990) 93
Dynamic theory of high-angle annular-dark-field STEM lattice images for a Ge/Si interface, *Wang and Cowley* 32 (1990) 275
An image and spectrum acquisition system for a VG HB501 STEM using a color graphics workstation, *Kirkland* 32 (1990) 349
Digital X-ray mapping on an HB501 STEM; a new approach for the analysis of interfaces, *Long* 34 (1990) 81
Study of highly dispersed Pt in Y-zeolites by STEM and electron microdiffraction, *Pan, Cowley and Chan* 34 (1990) 93
Defocus determination in the STEM by phase contrast methods, *Hammel, Colliex, Mory, Kohl and Rose* 34 (1990) 257
High resolution side-band holography with a STEM instrument, *Cowley* 34 (1990) 293

Biological structures imaged in a hybrid scanning transmission electron microscope and scanning tunneling microscope, *Stemmer, Reichelt, Wyss and Engel* 35 (1991) 255
Biassed secondary electron imaging of monatomic surface steps on vicinal Si(100) in a UHV STEM, *Drucker, Krishnamurthy and Hembree* 35 (1991) 323
Imaging with high-angle scattered electrons and secondary electrons in the STEM, *Liu and Cowley* 37 (1991) 50
Energy-filtered convergent-beam electron diffraction in STEM, *Xu, Loane and Silcox* 38 (1991) 127
Utilization of STEM nanodiffraction data, *Konnert and D'Antonio* 38 (1991) 169
Incoherent imaging of zone axis crystals with ADF STEM, *Loane, Xu and Silcox* 40 (1992) 121
Measurement of spherical aberration in STEM, *Wong, Kirkland, Xu, Loane and Silcox* 40 (1992) 139
De-channelling contrast in annular dark-field STEM, *Cowley and Huang* 40 (1992) 171
Factors limiting the spatial resolution and sensitivity of EELS microanalysis in a STEM, *Weiss and Carpenter* 40 (1992) 339

Scanning tunneling microscopy

Nucleation and growth of epitaxial silicon on Si(001) and Si(111) surfaces by scanning tunneling microscopy, *Hamers, Köhler and Demuth* 31 (1989) 10
Scanning tunneling microscopy of a hydrated bacterial surface protein, *Guckenberger, Wiegräbe, Hillebrand, Hartmann, Wang and Baumeister* 31 (1989) 327
Scanning tunneling microscopy on laser- and thermal-annealed Si(111): transitions from 7×7 reconstructed to disordered surface structures, *Wiesendanger, Tarrach, Scandella and Güntherodt* 32 (1990) 291
Preface to Scanning Tunneling Microscopy and Related Techniques, *Isaacson* 33 (1990) 65
Observation of the graphite surface by reflection electron microscopy during STM operation, *Spence, Lo and Kuwabara* 33 (1990) 69
Practical applications of scanning tunneling microscopy, *Denley* 33 (1990) 83
The atomic force microscope: a tool for science and industry, *Gould, Drake, Prater, Weisenhorn, Manne, Kelderman, Butt, Hansma, Hansma, Magonov and Cantow* 33 (1990) 93
Scanning tunneling microscopy of the enzymes of muscle glycogenolysis, *Edstrom, Meinke, Yang, Yang and Evans* 33 (1990) 99
Scanning tunneling microscopy of planar biomembranes, *Fisher, Yanagimoto, Whitfield, Thomson, Gustafsson and Clarke* 33 (1990) 117
Scanning tunnelling microscopy of nucleic acids and polynucleotides, *Arscott and Bloomfield* 33 (1990) 127
Imaging biological macromolecules by STM: quantitative interpretation of topographs, *Stemmer and Engel* 34 (1990) 129
Scanning tunneling microscopy of a liquid crystalline phase of poly((dA-dT)·(dA-dT)) induced by a histone H_1 peptide, *Coratger, Chahboun, Ajustron, Beauvillain, Erard and Amalric* 34 (1990) 141
Simple model of image formation by scanning tunneling microscopy of non-conducting materials, *Yuan and Shao* 34 (1990) 223
A comparative study of microstructure (in ITO films) and techniques (CTEM and STM), *Rauf and Walls* 35 (1991) 19
Atomic-force microscopy of synthetic ultrafiltration membranes in air and under water, *Dietz, Hansma, Herrmann, Inacker and Lehmann* 35 (1991) 155
Biological structures imaged in a hybrid scanning transmission electron microscope and scanning tunneling microscope, *Stemmer, Reichelt, Wyss and Engel* 35 (1991) 255
The instrument response function in air-based scanning tunneling microscopy, *Fraundorf and Tentschert* 37 (1991) 125
Electrochemically induced adsorption of radio-labeled DNA on gold and HOPG substrates for STM investigations, *Brown, Allison, Warmack, Jacobson, Larimer, Woychik and Carrier* 38 (1991) 253
Scanned-tip reflection-mode near-field scanning optical microscopy, *Cline, Barhatzky and Isaacson* 38 (1991) 299

Specimen preparation

A fast preparation technique for high-quality plan view and cross-section TEM specimens of semiconducting materials, *Romano, Vanhellemont, Bender and Morante* 31 (1989) 183
Evaporated carbon stabilizes thin, frozen-hydrated specimens, *Jakubowski, Baumeister and Glaeser* 31 (1989) 351
Spurr resin affects the ultrastructure of freeze-fixed/freeze-substituted pollen grains, *Hess* 34 (1990) 219
A simple, inexpensive saddle-field ion gun for the preparation of TEM specimens, *Garulli and Corticelli* 34 (1990) 299
Electropolishing of polycrystalline and single-crystal $YBa_2Cu_3O_{7-\delta}$ for TEM studies, *Wheeler* 35 (1991) 59
Effect of surface roughness of carbon support films on high-resolution electron diffraction of two-dimensional protein crystals, *Butt, Wang, Hansma and Kühlbrandt* 36 (1991) 307

HVEM studies of the sintering of MgO nanocrystals prepared by $Mg(OH)_2$ decomposition, *Thangaraj, Westmacott and Dahmen* 37 (1991) 362
Small-angle cleavage of semiconductors for transmission electron microscopy, *McCaffrey* 38 (1991) 149
Preparation and detection of reconstructed plan-view surfaces, *Dunn, Ai, Savage, Zhang and Marks* 38 (1991) 333
A technique for fabrication of textured thin carbon substrates, *Reznik and Isaacson* 40 (1992) 181
New life for unusable electropolished TEM foils, *Smith-Wackerle and Trybus* 40 (1992) 187

Spectrometers, auxiliary apparatus

Direct parallel detection of energy-resolved large-angle convergent-beam patterns, *Quandt, La Barré and Niedrig* 33 (1990) 15
Nonlinear organic photoemitters: their properties and possible applications in electron microscopy, *Massey, Ash and Zhou* 36 (1991) 186

Surfaces, clusters, interfaces and particles

Atomic structure of reconstructed group IV and III–V semiconductor surfaces, *Chadi* 31 (1989) 1
Nucleation and growth of epitaxial silicon on Si(001) and Si(111) surfaces by scanning tunneling microscopy, *Hamers, Köhler and Demuth* 31 (1989) 10
Dynamic observation of gold adsorption on Si(111)7 × 7 surface by high-resolution reflection electron microscopy, *Tanishiro and Takayanagi* 31 (1989) 20
Surface faceting and the equilibrium crystal shape, *Williams and Bartelt* 31 (1989) 36
Surface reactivity and surface spectroscopies, *Madix* 31 (1989) 58
Ultrastructures for one- or two-dimensional confinement in compound semiconductors, *Petroff* 31 (1989) 67
Influence of adsorption-site geometry and diffusion on thin-film growth: Pt/Pd (100), *Evans, Flynn and Thiel* 31 (1989) 80
Ordering kinetics at surfaces, *Lagally, Kariotis, Swartzentruber and Mo* 31 (1989) 87
Surface profile imaging of a bismuth uranium oxide, Bi_2UO_6, *White, Ramdas, Hutchison and Billyard* 31 (1989) 124
The oxidation of small rhodium metal particles, *Logan, Braunschweig, Datye and Smith* 31 (1989) 132
Surface studies of catalytic ceria using atomic-resolution TEM, *Cochrane, Hutchison and White* 31 (1989) 138
HREM study of surface rearrangements on AgI, *Malm* 31 (1989) 143
Ballistic surface diffusion, *Ma and Marks* 31 (1989) 193
Surface channelling effects in electron holograms, *Cowley* 31 (1989) 223
Accurate modeling of particle–substrate coupling of surface plasmon excitation in EELS, *Ouyang and Isaacson* 31 (1989) 345
Surface structure of the α-Al_2O_3 single crystals: indexing the facets with computer simulation, *Hsu and Kim* 32 (1990) 103
The measurement of the roughness of W/Si multilayers using the Fresnel Method, *Shih and Stobbs* 32 (1990) 219
Dynamic theory of high-angle annular-dark-field STEM lattice images for a Ge/Si interface, *Wang and Cowley* 32 (1990) 275
Scanning tunneling microscopy on laser- and thermal-annealed Si(111): transitions from 7 × 7 reconstructed to disordered surface structures, *Wiesendanger, Tarrach, Scandella and Güntherodt* 32 (1990) 291
Energy loss of fast electrons moving near plane boundaries with dispersive media, *Zabala and Echenique* 32 (1990) 327
On the Fresnel-fringe technique for the analysis of interfacial films, *Rasmussen and Carter* 32 (1990) 337
Comparison of surface step images in reflection electron microscopy and scanning reflection electron microscopy, *Banzhof and Herrmann* 33 (1990) 23
TEM in-situ investigations of the crystallization behaviour of amorphous silicon thin films, *Reiche and Hopfe* 33 (1990) 41
High-resolution electron microscopy studies of Nb/Al_2O_3 interfaces, *Mayer, Flynn and Rühle* 33 (1990) 51
Surface roughness studies in small particles using HREM, *Yacamán, Herrera, Tehuacanero, Gómez and Beltrán del Río* 33 (1990) 133
Improvement of resolution by convergent-beam illumination in surface profile images of high resolution transmission electron microscopy, *Mitome, Takayanagi and Tanishiro* 33 (1990) 255
Chemistry on monolayer metallic films, *Goodman* 34 (1990) 1
High resolution electron microscopy of ceria-supported catalysts, *Cochrane, Hutchison, White, Parkinson, Dupas and Scott* 34 (1990) 10
Dynamic electron microscopy of copper–palladium intermetallic compound catalysts, *Gai and Smith* 34 (1990) 17
Vanadium oxide on TiO_2(B) – a HREM study of catalysis by support interaction, *Wallenberg, Andersson and Sanati* 34 (1990) 33
X-ray diffraction studies of catalysts, *Cohen* 34 (1990) 41

Characterization of surface structure in heterogeneous catalysts by high-resolution transmission electron microscopy, *Datye, Logan, Blankenburg and Smith* 34 (1990) 47
Characterization of filamentous carbon on Ni/MgO catalysts by high-resolution electron microscopy, *Smith, McCartney, Tracz and Borowiecki* 34 (1990) 54
HREM characterization of metal catalysts supported on rare-earth oxides: samarium oxide as support, *Bernal, Botana, Calvino, Cifredo, García and Rodríguez-Izquierdo* 34 (1990) 60
The structure of ruthenium supported on titania: a catalyst for low-temperature methanation of carbon dioxide, *Ruterana, Buffat, Thampi and Graetzel* 34 (1990) 66
Quantitative Pt and Rh distributions in pollution-control catalysts, *Lyman, Hepburn and Stenger* 34 (1990) 73
Quantitative chemical lattice imaging: theory and practice, *Ourmazd, Baumann, Bode and Kim* 34 (1990) 237
Energy-loss profiles of transmitted electrons incident on dielectric spheroids, *Illman, Anderson, Warmack and Ferrell* 35 (1991) 1
HREM of epitaxial layers in the InAs/GaAs system, *Karasev, Kiselev, Orlova, Gribelyuk, Gutakovsky, Kanter, Pintus, Rubanov, Stenin and Fedorov* 35 (1991) 11
Investigation of the atomic structure and visibility of crystal/amorphous interfaces in $Pd_{80}Si_{20}$ alloy by HRTEM image simulations, *Shieh, Stanwood and Howe* 35 (1991) 99
Support effects on the surface plasmon modes of small particles, *Zabala and Rivacoba* 35 (1991) 145
Fine details in satellite HOLZ reflection discs of CBED from a GaAs/AlAs multilayer, *Gong and Schapink* 35 (1991) 171
The use of the Fresnel Method for the characterisation of a short-period strained Ge/Si multilayer. I. Measurement of the average Ge/Si volume ratio, *Shih and Stobbs* 35 (1991) 197
The use of the Fresnel Method for the characterisation of a short-period strained Ge/Si multilayer. II. Measurement of a layer-thickness irregularity, *Shih and Stobbs* 35 (1991) 217
A treatment of dynamical diffraction for multiply layered stuctures, *Rossouw, Al-Khafaji, Cherns, Steeds and Touaitia* 35 (1991) 229
Contrast simulation of high resolution electron holography on surface structures, *Tanji, Ito and Yada* 35 (1991) 245
Composite thin-film characterization by atom probe field ion microscopy, *Melmed and Camus* 35 (1991) 277
Biassed secondary electron imaging of monatomic surface steps on vicinal Si (100) in a UHV STEM, *Drucker, Krishnamurthy and Hembree* 35 (1991) 323
Emission microscopy and surface science, *Mundschau* 36 (1991) 29
Design of a new photo-emission/low-energy electron microscope for surface studies, *Tromp and Reuter* 36 (1991) 99
A UHV-compatible photoelectron emission microscope for applications in surface science, *Engel, Kordesch, Rotermund, Kubala and Von Oertzen* 36 (1991) 148
The characterisation of GaAs/(Al,Ga)As heterostructure interface roughness using Fresnel analysis, *Ross and Stobbs* 36 (1991) 331
A new in situ technique for studying deformation and fracture in thin film ductile/brittle laminates, *Hackney and Milligan* 37 (1991) 79
UHV microscopy of surfaces, *Marks, Ai, Bonevich, Buckett, Dunn, Zhang, Jacobi and Stair* 37 (1991) 90
Imaging and spectroscopy of α-Al_2O_3, diamond, Ni and Fe bulk crystal surfaces, *Wang and Bentley* 37 (1991) 103
High-resolution electron microscopy of interfaces in fcc materials, *Merkle* 37 (1991) 130
High-resolution electron microscopy of BN on MgO: a model ceramic–ceramic interface, *Allard, Datye, Nolan, Mahan and Paine* 37 (1991) 153
Characterization of thin films, interfaces and surfaces by high-resolution electron microscopy, *Smith, Li, Lu, McCartney and Tsen* 37 (1991) 169
High-resolution electron microscopy observations of faceted grain boundaries and twins in bismuth-doped copper, *Luzzi* 37 (1991) 180
Chemical composition and lattice relaxations at diffusion-bonded Nb/Al_2O_3 interfaces, *Knauss and Mader* 37 (1991) 247
Microstructural characterization of a creep-deformed SiC whisker-reinforced Si_3N_4, *More, Koester and Davis* 37 (1991) 263
Morphology and motion of the interface between amorphous and crystalline cobalt disilicide, *Smith and Allen* 37 (1991) 279
Cross-sectional transmission electron microscopy study of phase transformations at TiN film/steel substrate interfaces, *Erdemir and Cheng* 37 (1991) 286
On the origins of ghost boundaries during in situ strain-induced grain-boundary migration, *Lillo, Hackney and Plichta* 37 (1991) 294
TEM study of B- and Er-containing disper-

soids in rapidly solidified dispersion-strengthened titanium and titanium aluminide alloys, *Schwartz, Fraundorf and Sastry* 37 (1991) 310
[001] tilt grain boundaries in $YBa_2Cu_3O_{7-x}$ thin films, *Gao, Merkle, Bai, Chang and Lam* 37 (1991) 326
Oxygen, diffuse scattering, and TWEED structure in the $YBa_2Cu_3O_{7-\delta}$ system, *Zhu, Suenaga and Moodenbaugh* 37 (1991) 341
TEM characterization of modulated microstructures in $CaO-Dy_2O_3$ solid solutions, *Kim and Kriven* 37 (1991) 351
Electron-beam-induced transformations of gold particles epitaxially grown on MgO microcubes, *Giorgio, Henry, Chapon, Nihoul and Penisson* 38 (1991) 1
Rigor, and plan-view simulation of surfaces, *Marks* 38 (1991) 325
Preparation and detection of reconstructed plan-view surfaces, *Dunn, Ai, Savage, Zhang and Marks* 38 (1991) 333
Validity of the kinematical approximation in transmission electron diffraction for surfaces, revisited, *Marks, Savage, Zhang and Ai* 38 (1991) 343
Dynamic observation of dislocation movement across twin boundaries in the lamellar structure of TiAl intermetallic compound, *Hanamura, Uemori, Tanino and Morikawa* 39 (1991) 86
In situ observations of solid–liquid interfaces, *Saka, Sasaki, Ohashi, Ohtsuka, Kamino and Tomita* 39 (1991) 110
Grain boundary premelting in thin foils of deformed copper bicrystals, *Inoko, Hama, Tagami and Yoshikawa* 39 (1991) 118
Aluminum/ceramic interface structure and its related properties, *Naka* 39 (1991) 128
High-resolution electron microscope study of lamellar boundaries in Ti-rich TiAl polysynthetically twinned crystals, *Inui, Nakamura, Oh and Yamaguchi* 39 (1991) 268
Stereoscopic observation and determination of surface orientation of voids in stress-thermal-migrated-aluminum lines of LSI with UHVEM, *Takaoka and Ura* 39 (1991) 299
Surface wave excitation Auger electron spectroscopy of Si(001) reconstructed surfaces, *Nakayama, Nishino, Ueda, Takeno and Fujita* 39 (1991) 329
Atom clusters – new applications of high-voltage electron microscopy "micro-laboratory" to materials science, *Fujita* 39 (1991) 369
Anomalous surface structure of fine germanium particles, *Mitome and Takayanagi* 39 (1991) 382
UHV microscopy of surfaces, *Ai, Buckett, Dunn, Savage, Zhang and Marks* 39 (1991) 387
Observations by HVEM of atomic clusters embedded in MgO crystals, *Tanaka, Kimoto and Mihama* 39 (1991) 395
Foreword to The Structure and Properties of Interfaces, *Smith and Carpenter* 40 (1992) 197
Micromechanical modelling of interfacial decohesion, *Needleman* 40 (1992) 203
Response of metal matrix composites with imperfect bonding, *Herakovich and Hidde* 40 (1992) 215
A comparative high-resolution study of interface chemistry in silicon-nitride-based ceramic matrix composites reinforced with silicon carbide whiskers, *Das Chowdhury, Carpenter and Braue* 40 (1992) 229
Molecular dynamics simulations of 45° [100] twist plus tilt grain boundaries in aluminum, *Weinberg, Shamsuzzoha and Deymier* 40 (1992) 240
High-resolution transmission electron microscopy of grain boundaries in aluminum and correlation with atomistic calculations, *Mills, Daw, Thomas and Cosandey* 40 (1992) 247
Structure and precipitation on a $\Sigma = 13$ tilt grain boundary in silicon, *Kim, Carpenter, Chen and Schwuttke* 40 (1992) 258
Morphology of silicon grain boundaries in Sr-modified Al–Si eutectic alloys by HREM, *Shamsuzzoha, Deymier and Smith* 40 (1992) 265
Electron microscopy studies of metal/MgO interfaces, *Lu and Cosandey* 40 (1992) 271
Quantification of atomic-scale grain boundary parameters by high-resolution electron microscopy, *Merkle* 40 (1992) 281
High-resolution electron microscopy of planar inversion domain boundaries in aluminum nitride, *McCartney, Youngman and Teller* 40 (1992) 291
Boundary characterisation methods using the TEM, *Stobbs* 40 (1992) 300
Computer simulation of misfit dislocation contrast at an FeAl/GaAs interface, *Angelo and Gerberich* 40 (1992) 313
From single defects to a structure–property relationship for polycrystals, *Smith* 40 (1992) 321
Application of the in situ TEM deformation technique to observe how "clean" and doped grain boundaries respond to local stress concentrations, *Robertson, Lee and Birnbaum* 40 (1992) 330
High-angle annular dark-field microscopy of Mo/Si multilayer structures, *Liu, Cheng, Cowley and Stearns* 40 (1992) 352

Experimental measurements of interfacial properties in brittle fibrous composites, *Cox and Marshall* 40 (1992) 365
High-resolution electron microscopy study of ALMBE InAs grown on (001) GaAs substrates, *Molina, Aragón, Petford-Long and García* 40 (1992) 370
Grain boundaries in nanophase materials, *Siegel and Thomas* 40 (1992) 376

Thick specimens
Validity of the kinematical approximation in transmission electron diffraction for surfaces, revisited, *Marks, Savage, Zhang and Ai* 38 (1991) 343
EELS of "thick" specimens, *Egerton, Wang and Chen* 38 (1991) 349

Abstracts / Announcements / Book reviews / Comments / Editorials / Reports
Foreword to Surfaces and Surface Reactions, *Venables and Smith* 31 (1989) ix
Guest editorial, *Valdrè* 31 (1989) 159
New books, journals, proceedings,..., *Hawkes* 31 (1989) 245
Special announcement 31 (1989) 257
Abstracts of papers presented at the Annual Conference of the Netherlands Society of Electron Microscopy, Wageningen, The Netherlands, November 1989 31 (1989) 455
Preface to Electron Spectroscopic Imaging and Analysis Techniques, *Reimer* 32 (1990) vii
Abstracts of papers presented at the 23rd Scientific Meeting of the Israel Society of Electron Microscopy and 1st Joint Israeli–German Electron Microscopy Symposium, Rehovot, Israel, 15–16 May 1989, *edited by E. Grünbaum* 32 (1990) 185
Abstracts of papers presented at the 17th National Congress on Electron Microscopy, Lecce, Italy, 4–7 October 1989, *edited by G. Pozzi* 32 (1990) 205
Contrast transfer theory for non-linear imaging (*Addendum*), *Bonevich and Marks* 32 (1990) 297
Introduction to Collection of Papers dedicated to Prof. J. Heydenreich, *Bethge* 33 (1990) vii
Recent developments in electron-optical instrumentation and computer-aided design, *Mulvey and Tahir* 33 (1990) 1
Preface to Scanning Tunneling Microscopy and Related Techniques, *Isaacson* 33 (1990) 65
New books, special issues..., *Hawkes* 33 (1990) 215
Special announcement 33 (1990) 226
Foreword to Characterization of Catalysts, *Cowley* 34 (1990) ix
Guest editorial, *Sawatzky* 34 (1990) 227
Editorial 35 (1991) v
Vernon Ellis Cosslett (1908–1990), *Hawkes* 35 (1991) 169
Bibliography on emission microscopy, mirror electron microscopy, low-energy electron microscopy and related techniques: 1985–1991, *Griffith, Habliston and Birrel* 36 (1991) 262
Image processing and image simulation (*Guest editorial*), *Hovmöller* 36 (1991) 275
Proceedings, progress and advances, *Hawkes* 36 (1991) 387
Foreword to Frontiers of Electron Microscopy in Materials Science, *Bradley, King and Allen* 37 (1991) vii
New books and journals, *Hawkes* 38 (1991) 353
Report of a meeting, *Leapman* 38 (1991) 361
Foreword to High-Voltage Electron Microscopy, *Fujita, Ura and Mori* 39 (1991) xiii
Preface to Novel Methods of Analysis in 2D and 3D Microscopy, *Frank* 40 (1992) vii
Book review, *Roos* 40 (1992) 191
Foreword to The Structure and Properties of Interfaces, *Smith and Carpenter* 40 (1992) 197
